## Land parcel configuration

| Nº of land plot  | Area of land plot according to the state certificate property act, ha | Current land special-purpose designation  |
|--|---|---|
| Subject area of land plot (marked by blue color on the scheme) |   |   |
| I  | 0,8000  | For placing and maintenance of real estate objects (household constructions and courts) |
| II   | 1,1250  |   |
| III  | 0,4734  |   |
| IV   | 0,0122  |   |
| V  | 0,6006  |   |
| <b>Total area</b>  | <b>3,0112</b>   | —   |

|  |                |   |
|--|----------------|---|
| Purchase of stated below land plots is possible from third-party land owners (marked by red color on the scheme) |                |   |
| VI   | 0,1000         | — |
| VII  | 0,5157         |   |
| VIII   | 0,3474         |   |
| IX   | 0,7248         |   |
| X  | 1,2864         |   |
| XI   | 10,5158        |   |
| <b>Total area</b>  | <b>13,4901</b> | — |

|                   |                |   |
|-------------------|----------------|---|
| <b>Total area</b> | <b>16,5013</b> | — |
|-------------------|----------------|---|

### Constitutive information

5 state property acts on the right of ownership (marked by I—V on the scheme).  
Land parcel is a part of an administrative units of Schaslyve village council.

### Contract form

Agreement on sales of corporate rights of legal entity (resident of Ukraine), owning a land parcel.

### Possible purpose

Within the framework of commercial offer it is possible to change the current land special purpose designation according to plans of their further development.

Object territorial abuts with areas which are under residential and public development (west), areas intended for the building of commercial objects (north, east, south).

## Engineering communications and objects

### Communal objects

| № | Name of networks                            | Legend  | Description of networks |                       |
|---|---|---|-------------------------|-----------------------|
|   |   |   | ø, mm                   | Extent of networks, m |
| 1 | Plumbing                                    |  | 100                     | 5                     |

| 6 | Lines of electricity transmissions (0,4 kW) |  | x                       | 164                   |

## Real estate objects

| №                 | Objects           | Area,<br>m <sup>2</sup> |
|-------------------|-------------------|-------------------------|
| 1                 | Registered in BTI | 2 211                   |
| 2                 | Unregistered      | —                       |
| 3                 | Hothouses         | 9 000                   |
| <b>Total area</b> |                   | <b>11 211</b>           |

Objects of archaeological and monuments of archaeology are absent on the land parcel. Archaeological researches, excavations and surveys were not conducted.

## Transport accessibility

### Legend

- Two-ways asphalt road to motorway Kyiv-Kharkiv
- Direction of motion

### Transport availability

- center of Kyiv — 22 km;
- central railway station — 26 km;
- nearest subway station («Borispilska») — 9 km;
- nearest railway station («Alexandrovka») — 3 km;
- international airport «Borispil» — 8 km;
- airport «Kyiv» («Zhulyanu») — 30 km;
- river-boat station — 25 km;
- railway station «Darnitsya» — 14 km.

## Survey descriptions

### Climate

The climate of the region is moderately continental.

Duration of sun period is 1900—2000 hours in a year. Total sun radiation is 3800—4000 MJ / sq. m in a year. The average July temperature is +19,50°C, the average January temperature is -6°C. Amount of days with a temperature higher 0°C is 245. For the region is characteristically the cold winters with long duration. The snow cover keeps up to 105--110 days.

Annual rainfall does not exceed 530 mm. Amount of useful fallouts is ordinary 210—220 mm. The areas of formation excessive fog are absent.

### Ecology

Greater part of territory – about 1,1 ha – is under hothouses. Area about 2,7 ha is covered by grass vegetation. Territory is occupied by rarely growing trees, which are presented by a maple, acacia, poplar. Height of trees from 5 to 20 m, diameter of tree-trunk is 20—50 cm. The preserved areas are absent on the territory.

### Topography

The absolute marks of territory vary from 130,7 m to 131,2 m above the sea level. The height discontinuity is up to 0,5 m. Considerable local deviations on a site are absent.

### Soils

The structure of soil is made by fine-grained and quartz sands, loesslike loams, which serve as natural base for foundations of buildings. Depth of soil's freezing is 120 cm. Normative loadings are 2 kg/sm. Calculation temperature for enclosing structures is -21°C.

The territory's soil cover has low degree of suitability for the agricultural development. Humus contend in the arable layer from 1,2% to 2,8%.

### Hydrology

The water-supply can be provided with organization of downhole water intake. The territory has two basic aquiferous horizons: Senomanskiy with the depth of 120 m and Jurassic with the depth of 270 m.

### Geology

The area is located on the forest-steppe plain of the Pridneprovskaya lowland. As for geological review, the territory of district is presented by Senomanskiy tier (sands with the layers of sandstones), Kharkovskaya retinue (fine-grained sands and clays).

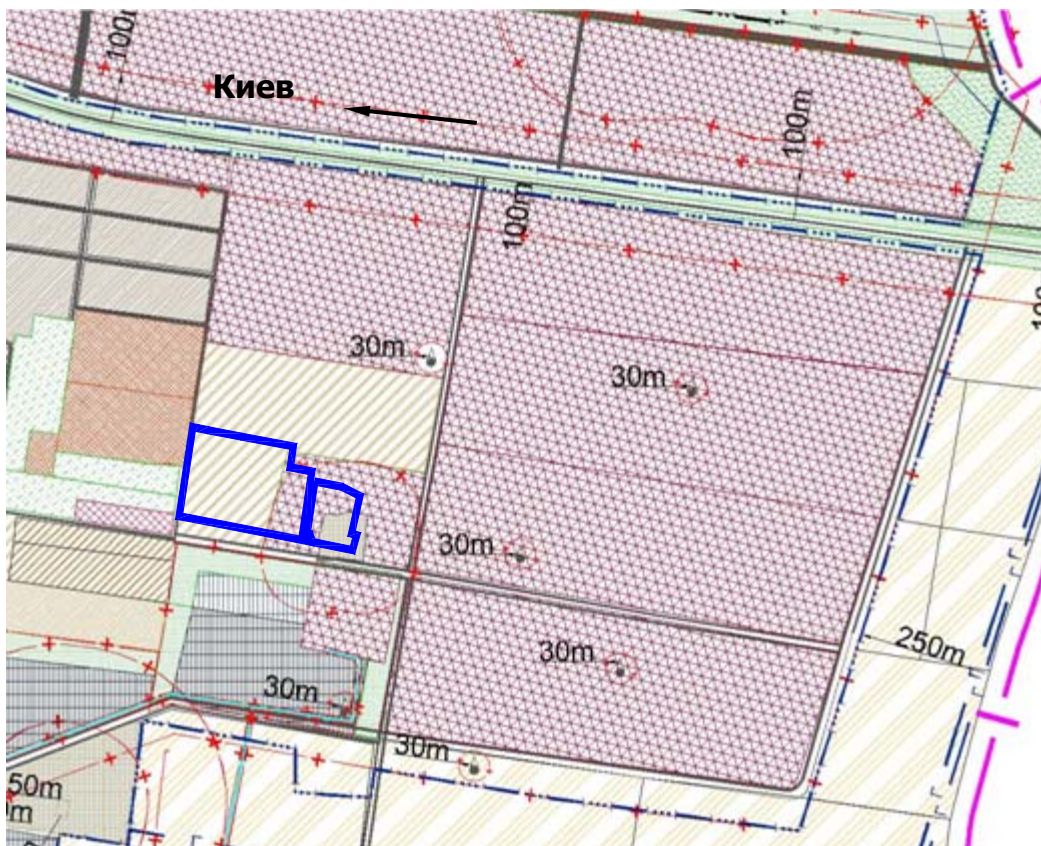

|  | Layer of soil | Thickness of layer, m | Type of soil   |
|--|---------------|-----------------------|--|
|  | 1a            | 0,1                   | Ground-vegetable layer, placed sand, humus   |
|  | 3M            | 2,3                   | Sand is shallow with a middle density and small degree of water saturation           |
|  | 2a            | 1,5                   | Sandy loams, pulverulent, with sand layers, plastic, on the verge of the firm        |
|  | 2             | 0,2                   | Sandy loams, pulverulent, plastic, firm in places                                    |
|  | 3M            | 2,1                   | Sand is shallow with a middle density and small degree of water saturation           |
|  | 2a            | 1,3                   | Sandy loams, pulverulent, with sand layers, plastic, on the verge of the firm        |
|  | 3ПМ           | 2,4                   | Sand is shallow and dense, from small degree of water-saturation to sated with water |
|  | 4c            | 1,3                   | Sand is shallow with a middle density and small degree of water saturation           |
|  | 3aПМ          | 0,9                   | Sand is shallow and dense, from small degree of water saturation to sated with water |
|  | 2             | 1,4                   | Sandy loams, pulverulent, plastic, firm in places                                    |
|  | 2a            | 2,3                   | Sandy loams, pulverulent, with sand layers, plastic, on the verge of the firm        |
|  | 5n            | 2                     | Sand is pulverulent with a small degree of water saturation                          |
|  | 3aПМ          | 3,5                   | Sand is shallow and dense, from small degree of water-saturation to sated with water |

114.32

26.03.08 – absolute bench-mark of subsoil waters on the depth of 16,20 m

## Fragment of territories planning scheme of Schaslyve village council

as of 01.12.08

Note.

The scheme of Shaslyve village council's territories planning is developed by «UkrNIIPromgrazhdanselstroy» design institute, according to agreement № 8164 on implementation of design and exploration work, dated 11.07.08.

## Airview on the land parcel

## Contact information

Within the framework of commercial offer we are ready to consider the different variants of transaction's executing:

- sale of land parcel;
- partnership;
- development made to order.

Our team can offer you realization of the followings stages:

- development of project's town-planning ground;
- participating in the resolving of pecuniary and legal questions;
- development and claim of project documentation;
- construction and management of object.

We pays serious attention to building and strengthening our connections with investors, potentially interested in participating in the real estate projects, which are being realized in Kiev and Ukraine.
